GLOBAL HEALTH SELECTIVE

Reducing inequities in access to quality healthcare, both locally and globally, requires a nuanced understanding of health determinants examined through political, historical, structural, and social lenses. In this course, we explore the underlying variables that shape healthcare access and delivery, and that present challenges to closing the health equity gap. Themes addressed include the global burden of disease, the various global health players, the importance of human rights in advocating for health equity, and the intersection between climate change and health. We will also address approaches to ethical and sustainable global health partnerships.

Enrollment is required for students who are enrolled in DGSOM’s longitudinal Global Health Equity Pathway or who are considering the Concentration. Students can drop the selective at any time if they find they are unable to meet the attendance requirements, so we encourage you to enroll if you are interested.

To enroll in the Selective, please fill out the Selective Enrollment Form*.

*Enrollment in the Selective is unlimited

REQUIRED SELECTIVE EVENTS

- Sept. 14
  12:30-2:30 PM
  GH 130
  INTRO TO SELECTIVE: DECOLONIZING GLOBAL HEALTH

GLOBAL HEALTH SELECTIVE: PARTNER CONVERSATIONS

As a part of GHP’s Selective, we have invited our global health partners to connect with students on work our partners are doing around the world. These discussions will feature experienced global health practitioners sharing insights on topics such as HIV transmission and mental health in African countries, tropical and infectious diseases in Asia, and medical education in South America.

**Selective students should sign up for a minimum of two partner conversations; you may sign up for more than two as long as you commit to attending those that you select.**

Please see below for a description of the various discussions and [click here](#) to sign up for the sessions.
